1. The following is an examiner's statement of reasons for allowance:

The invention is directed to an image processing device for carry out a dodging treatment for performing dynamic range compression on unsharp luminance signal and further subtracting the unsharp luminance signal from the input color signals.

Independent claims 1 identifies the uniquely distinct features of "the second processing line comprising at least one memory for delaying the input color image signals for a time period corresponding to a delay time which occurs as a result of processing in the first line." The closest prior art, Shiota et al (US 6,674,544) disclosed a similar image processing devcie; either singularly or in combination with other cited references, fail to anticipate or render the above underlined limitations obvious (to be used with other claimed limitations).

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
